

# Aeroqual Field-Ready Kit Options

## Immediate, perimeter air monitoring—out of the box.

Specto's Aeroqual Field-Ready Kits are fully integrated, pre-configured solutions designed for rapid field deployment. Each kit includes an Aeroqual air quality monitor, tripod, battery pack, service kit, and weather station, ensuring defensible data collection wherever your project requires it.

### Option 1 – Compact Kit

#### Lightweight. Modular. Courier-ready.

This configuration pairs a smaller Pelican case with a tripod in a dedicated shoulder carry bag.

- ▶ Ideal for local transport and projects requiring frequent site moves.
- ▶ Battery pack carried separately for easier handling and reduced overall weight.
- ▶ Compact footprint fits easily into standard vehicles.

Best for:

- ▶ Sites with minimal storage area.
- ▶ Frequently moving monitors between sites and locations.

### Option 2 – Integrated Kit

#### All-in-one protection for long-range transport.

This larger Pelican case houses the complete setup—including tripod, battery pack, and accessories—in a single rugged enclosure.

- ▶ Simplifies logistics for long-distance shipping or air freight.
- ▶ Provides maximum protection for sensitive instruments in transit.

Best for:

- ▶ Long-distance or international projects.
- ▶ Shipping monitors directly to site.

## Every Aeroqual Field-Ready Kit is built for compliance and certainty.

Pre-configured to your monitoring requirements, calibrated, and ready for immediate deployment—no delays, no setup failures.
