

eagle-cam

The eagle-cam remote camera monitoring system combines innovative hardware with the powerful data management software platform of eagle.io

The camera allows users to monitor their sites remotely using either time lapse photos or motion triggered video recordings. The latest images may be viewed on and replayed from an eagle.io dashboard. The hardware comes fully configured to stream data to eagle.io immediately upon power up.

Features:

- Zoom / tilt / pan functions
- Can push data (images and videos) to a ftp folder and to 3 x email addresses
- Control camera functions and view/record live stream of video using free client software
- Night Vision (up to 190ft)
- MicroSD card slot (can accept SD card up to 128GB)

Benefits:

- Immediate visibility on eagle.io platform once power and internet are provided to the hardware
- View live video and images from multiple cameras on mobile or desktop devices
- Only record video when motion triggered to save on data transmission costs
- Option to push video to an off-site NAS drive for permanent backup over the internet

Specifications:

Power Req:	DC 12V or PoE 48V (PoE with AC & DC power connections supplied)
Power Draw:	<20Watt draw
Data use:	approx. 2GB/month (assume time-lapse still images every 5-minutes, occasional video triggered)
Video Quality:	2560 x 1920 (5.0 Megapixels)
Movement control:	pan / tilt / zoom (4X)
Video Storage:	micro
Ingress Protection:	IP66
Working Range:	14°F to 131°F
Dimensions:	Φ136mm x 201mm
Weight	3.7 lbs
Size:	7.9" x 8.6"
