

Metal Road Monitoring Prism

SKU: SV-PR-MRD

The Metal Road Monitoring Prism is designed to be installed on active traffic roads, where it would be hazardous for personnel to be working. Road safety for both the surveyor and the motorists are the primary concerns during the design process of the product.

The monitoring prism features a housing that is manufactured from an aluminum cast which offers superior strength and longevity. It contains a 17.8 mm high accuracy optical coated prism.

The prism unit can be installed and secured using 4 survey nails or conventional bolts.

FEATURES

- > **Prism Diameter: 17.8 mm**
- > **Prism Height: 13.5 mm**
- > **Measuring Distance: 1000 m**
- > **Constant: 0**
- > **Accuracy: 5 arc seconds**
